REDUCER CONSTRUCTION IN THE NOVO-KRAMATORSKY MACHINE-BUILDING PLANT UNDER I. V. STALIN

H. G. Tava
H.S. Koverdynayev
S.D. Bekhter

This is the Table of Contents of a collection of articles by plant workers. The appendix of the book gives diagrams of various reducers, including one with a 4104-millimeter diameter. The book is available at the Library of Congress under the call number TJ-202-T4.7

TABLE OF CONTENTS

I. Gear-Cutting Processes

A. Gear Cutting, Using Hob Cutters	14
B. Gear Cutting, Using Shaper Cutters	26
C. Internal Gearing	47
D. Gear Cutting, Using End-Milling and Disc Cutters	55
E. Tooling of Conical Gear Wheels	64

II. Cylindrical and Conical Reducers

A. Designing Gear-Wheel Teeth	78
1. Determining the Designed Load	81
2. Straight-Tooth Gears	90
3. Spiral and Herringbone Gears	96
4. Bevel Gears	107
5. Permissible Tension and Choice of Materials for Gear Teeth	111
6. Basic Proportions in Gear Dimensions	114
7. Cylindrical One-Step Reducers	115
8. Cylindrical Two-Step Reducers	118
9. Cylindrical Three-Step Reducers	126
B. Forces Acting on the Shafts and Supports	127
C. Bearing Design	142
D. Construction of Cylindrical and Conical Reducers	152

50X1-HUM

E. Construction Forms for Reducer Parts	180
F. Oiling Reducers	210
G. Examples of Reducer Design	216
III. Testing Reducers	
A. The Testing Stand	228
B. Testing and Accepting the Finished Product	247
C. Experimental Data to be Obtained in Testing Reducers	254
IV. Technical Specifications and Instructions in Reducer Construction	
A. Technical Specifications for Reducer and Gear Forgings	265
B. Technical Specifications for Steel Castings for Gears	268
C. Technical Specifications for the Production and Acceptance of Welded Parts for Reducers	271
D. Technical Specifications for Mechanical Finishing and Assembly of Reducer Parts	273
E. Technical Specifications for Surface Hardening by Oxy acetylene Flame	279
F. Technical Specifications for High-Speed Reducers in Turboblenders	280
G. Instructions for Installing and Operating Cylindrical, Conical, and Worm Reducers	286
H. Technical Specifications in Accepting on Order and Producing Spare Parts for Gear and Worm Drives and Reducers at NKMZ	291
I. Instructions for Scraping Reducer Bushings	296
J. Instructions for Checking the Balance of Gears and Other Moving Parts	298
V. Toothed Couplings	
A. Designing the Teeth for "Pul"-Type Couplings and Determining the Torques of the Toothed Couplings	300
1. Brief Description of Toothed Couplings	300
2. General Considerations in Designing Teeth	302
3. Determining the Play Between the Teeth	302
4. Determining Tooth Deformations as a Function of the Play Between the Teeth	312
5. The Relationship Between Tooth Deformations and the Forces Causing Them	313
6. Tooth Design and Determination of the Transmitted by the Toothed Coupling	317
7. Determining the Torque Transmitted by the "Pul"-Type Toothed Coupling No 9	319
B. The Normal Arrangement of Toothed Couplings	321
C. Technical Specifications for Producing and Accepting Toothed Couplings	330
D. Appendix	334
